

OPEN THE DOOR TO INNOVATION

2N IP INTERCOMS, IP ACCESS & SIP AUDIO SYSTEMS

An Axis company

An Axis company

“For 29 years 2N has been on the forefront of access control and telecommunications. We take care to stay on the leading edge with our products, the R&D behind them, and the way we service our customers. We are proud of our growth on global markets and are now number one in IP intercoms.”

MICHAL KRATOCHVÍL

CEO, 2N Telekomunikace a.s.

„AXIS group including 2N have a common goal to contribute to a smarter and safer world. There is an increased customer demand for integrated solutions with open standards that deliver enhanced security. Together with 2N we can meet that demand.“

MARTIN ANDERSEN

Vice President New Business, Axis Communications

2N® IP VERSO

Modular intercom configurable to meet your needs

Bluetooth technology ensures access control to the facility

Intuitive touch display for outdoor application within up to 10,000 contacts in the structured list

Wide-angle HD camera with infrared light and night vision

Easy integration with IP telephone systems using SIP protocol support

Integration with IP camera systems, VMS, and NVR through ONVIF

2N® Mobile Video calls on your mobile phone

RFID smart card reader with NFC support

IP54

IK8

ANTI
VANDAL

-40°C to 60°C

HD VIDEO

The intercom's integrated HD camera can send quality images to camera systems, mobile devices or the 2N® Indoor Touch 2.0 and 2N® Indoor Compact.

NIGHT VISION

The intercom's camera with infrared night vision can record a potential intruder even in complete darkness without the intruder noticing it

MODULARITY

Taking advantage of the intercom's modularity you can choose a combination that suits your needs. For example, you can interconnect the touch screen with a Bluetooth unit and HD camera.

2N® LTE VERSO

Wireless communication through the LTE network

The ideal solution for retrofit installation in apartment buildings

Calls to mobile devices, 2N answering units and IP telephones

HD camera with night vision and movement detection

Remote configuration and administration through the My2N portal

Compatible with all modules for 2N® IP Verso

Video monitoring of entrance using the 2N® Mobile Video application

Option of combination with IP intercoms in one solution

RESIDENTIAL BUILDING RETROFIT

2N® LTE Verso is an ideal solution for installations where by using LTE connection and 2N® Mobile Video service it offers a full solution for apartment building communication without the need for wired infrastructure.

REMOTE GATEWAY

2N® LTE Verso can be used for remote locations like distant gates or buildings without wired infrastructure where only power source and LTE network is needed.

2N® IP SOLO

Wide-angle HD camera with infrared light and night vision

Easy integration with IP telephone systems using SIP protocol support

Snapshot of the visitor to email

Tamper switch detecting unauthorized device intrusions

Integration with Video Surveillance System

2N® Mobile Video calls on your mobile phone

Easy integration into the home automation system

Luxury IP intercom with flush or wall mounting options

IP54

IK8

ANTI
VANDAL

-40°C to 60°C

HOME AUTOMATION

Link the intercom to your home automation system via the open API.

NIGHT VISION

The intercom's camera with infrared night vision can record a potential intruder even in complete darkness without the intruder noticing it.

PICTURE TO EMAIL

When visitor calls from the intercom, it sends you their snapshot to email.

2N® IP BASE

Compact IP intercom with wide-angle HD camera

Durable aluminium frame in various colours

Excellent audibility in all conditions

Package includes one and two button versions

Inputs and outputs for the connection of electric locks or other accessories

Integration with VMS systems

Basic model can be extended with a 125kHz or 13.56MHz RFID card reader module

Video calls on your mobile phone using 2N® Mobile Video app

IP65

IK7

-40°C to 55°C

VIDEO CALLS ON VARIOUS DEVICES

An integrated HD camera ensures high quality video calls on mobile devices, 2N® Indoor Touch 2.0 or IP telephones.

ACCESS CONTROL SYSTEM

With its RFID card reader, the intercom can serve as a part of your access control system.

2N® IP FORCE

The toughest IP intercom on the market
able to withstand the most demanding
conditions

Wide-angle HD camera with infrared
light and night vision

10W loudspeaker for excellent audability
in loud environments

Integration with IP camera systems
through ONVIF protocol

RFID smart card reader with NFC
support and Wiegand interface

Highly durable aluminum housing

Video calls on your mobile phone
thanks to 2N® Mobile Video

Easy integration with IP telephone
systems thanks to SIP protocol
support

IP69K

IK10

**ANTI
VANDAL**

-40°C to 55°C

SCHOOL BUILDING SECURITY

The intercom is able to lock down school entrances according to pre-set time profiles.

SUPPLY ENTRY AND GROUNDS PROTECTION

In logistics areas no service ramp will be left unprotected.

HOME GUARDIAN

Its high durability and the possibility of video recording make the intercom a reliable guardian of any building entrance.

2N® IP SAFETY

The most durable IP intercom on the market able to withstand the most demanding conditions

Distinctive orange colour makes the intercom highly visible in emergency situations

10W loudspeaker for good audability in loud environment

Easy integration with IP telephone systems using SIP protocol support

Integrates with external IP cameras for video calls

Durable buttons backlit in a distinctive blue

Highly durable aluminum housing

The tamper switch detects forcible opening of the intercom

IP69K

IK10

ANTI
VANDAL

-40°C to 55°C

HIGHLY VISIBLE ASSISTANT AT PARKING LOTS

Installed in the parking lot exit it can significantly help in unexpected situations.

INFOPOINT IN CITY PARK

A visible and easily operated information point in city parks, relax areas or other public places.

SOS POINT

On highways, the intercom functions as a part of an SOS Point, a solution providing emergency communication between drivers and a supervision centre.

2N® IP UNI

- Quick to install design
- Durable stainless steel cover suitable for outdoor application
- Output for lock control

- Pictograms signalling the status of the intercom
- Tamper switch
- Easy integration with IP telephone systems using SIP protocol support

EASY COMMUNICATION IN OFFICES

For service entrances and back stairways in offices where it is necessary to ensure simple and safe communication.

INTERCOM FOR PHARMACIES WITH NIGHT WORK HOURS

An easy and effective system for calling personnel during night hours.

2N® INDOOR TALK

HD quality audio with superb clarity and suppression of background noise

Communication with visitors and the receptionist

Elegant design and superior workmanship with the highest quality components

Unique flush mount box used for the installation of 2N answering units*

Remote configuration and management suitable for residential complexes

10 ringtones with adjustable volume

Parental lock to prevent unwanted touching of buttons

Connection of a doorbell button from the entrance door to the flat

INTUITIVE UNIT FOR THE WHOLE FAMILY

The 2N® Indoor Talk is an elegant unit with intuitive control. You accept a call from the 2N IP intercom by pressing the green telephone button and open the door by pressing the lock button. Setting the volume or do not disturb mode is just as easy.

VARIABILITY THANKS TO THE METHOD OF INSTALLATION

With the unified installation box, installation is not only quick and precise, but also enables the easy replacement of answering units (a video unit for an audio unit) without any additional masonry work.

CONNECTION OF A DOORBELL BUTTON

You can connect the doorbell button by the door to your flat directly to the 2N answering units. As soon as a visitor presses this, the unit will play a different ringtone to a call from the main entrance.

2N® INDOOR COMPACT

4.3" display for video communication with visitors

Capacitive buttons located next to the display

Unique flush mount box used for the installation of 2N answering units*

Remote management and configuration via the My2N portal

Home screen displays the time and date

Missed calls logs supplemented by a sequence of images from the IP intercom

Switching between video from the IP intercom and an external IP camera

Parental lock activated and deactivated using a code

Dedicated button to call the lift from the comfort of your apartment

Induction loop output for the hearing impaired

Common
installation box

VIDEO UNIT FOR EVERY APARTMENT

With the 2N® Indoor Compact unit, you can always see who is calling from the intercom in front of the building. Talk to your visitor and open the door for them from the comfort of your apartment

VARIABILITY THANKS TO THE METHOD OF INSTALLATION

With the unified installation box, installation is not only quick and precise, but also enables the easy replacement of answering units (a video unit for an audio unit) without any additional masonry work.

ALWAYS KNOW WHO HAS ENTERED THE BUILDING

By switching between video from the intercom camera and an external IP camera, you can easily make sure that it really is just the visitor you saw from the IP intercom who entered the building or lift.

2N[®] INDOOR TOUCH 2.0

Luxury design and high-tech processing

7" touchscreen

HD quality audio and video communication

Easy installation and remote administration via web interface

reddot design award
winner 2017

Video monitoring of 2N IP intercoms

Video voicemail or visitor's snapshot in case of a missed call

Switching between video from the IP intercom and an external IP camera

Home automation integration using OS Android support

COMMUNICATE IN STYLE

You can use 2N® Indoor Touch 2.0 in your apartment or house as an answering station or to monitor what is happening at your door.

HOME AUTOMATION

Use 2N® Indoor Touch 2.0 as a control panel for home automation applications. Set your preferable temperature at home, pull down the blinds or play your favourite song.

2N® MOBILE VIDEO

Video calls on you mobile phone

Accept the call anywhere in the world

Building entrance monitoring

Open the door remotely

Solution for small residential installations as well as for large apartment buildings

Mobile Application available for iOS and Android

Video preview before call pick-up

Easy configuration and remote administration via My2N.com portal

Calls to multiple 2N answering units and IP phones at the same time

Missed calls log supplemented by a sequence of images of the caller

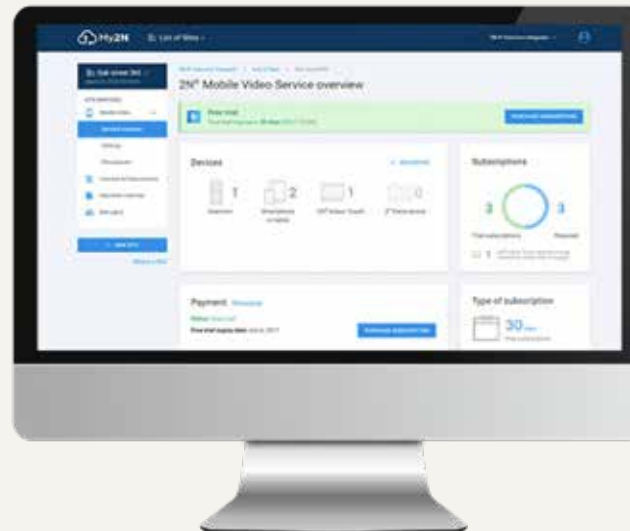

MY2N PORTAL

Professional cloud platform based on Amazon AWS

Portal accessible from all over the world

Bulk configuration of a large number of devices

Monitoring of connected devices 24/7

Administration of several different installations from one account

Secure solution with encrypted communication

Modern SW architecture based on microservices

Partner API for integration with other systems

MY2N CLOUD SERVICES

2N® MOBILE VIDEO

Cloud SIP proxy for video calls from IP intercoms

Push notification ensuring waking up of the mobile phone for every incoming call

Support of various SIP devices

2N® REMOTE CONFIGURATION

Remote configuration of 2N devices free of charge over the Internet

Immediate customer assistance without the need for on-site presence

Secure communication without any configuration of network components

2N® PARTNER API

Uniform interface for configuration of all 2N devices over the Internet

Connection of third-party mobile applications with the 2N® Mobile Video service

Display of the web configuration interface of 2N devices in your system

2N ACCESS UNIT

Combination of a door controller and reader

Ethernet cable for communication and power (PoE)

Connectors for connecting a strike, exit button and door contact directly to the unit

Tamper switch detects forcible opening of the unit

Connection of add-on modules for double-sided door security

Luxury design to match IP intercoms

Surface and flush installation of the unit, in black or nickel color

Memory for 10,000 users with various types of access credentials

Bulk administration of access rules via 2N® Access Commander

2N® Remote Configuration cloud service for remote administration

2N ACCESS UNIT

2N® ACCESS UNIT 2.0 RFID

Multi-frequency RFID card reader
(125kHz and 13.56MHz)

Open doors using a phone with
Android OS supporting NFC

Terminal for recording employee
attendance

2N® ACCESS UNIT 2.0 TOUCH KEYPAD & RFID

Multi-frequency RFID card reader
(125kHz and 13.56MHz)

Multi-factor authentication of users
in areas with enhanced security

Activation of a silent alarm in the event
of danger

2N® ACCESS UNIT 2.0 BLUETOOTH & RFID

Open doors using a phone with the
2N® Mobile Key app
(mobile credentials for free)

Various modes for opening doors
with adjustable distances

Multi-frequency RFID card reader
(125kHz and 13.56MHz)

2N ACCESS UNIT

2N® ACCESS UNIT BLUETOOTH

Open doors using a phone with the 2N® Mobile Key app (mobile credentials for free)

Encrypted, secure communication between the phone and the unit

Simple and safe process of pairing a phone with the unit

2N® ACCESS UNIT FINGERPRINT READER

Quick fingerprint recognition and evaluation

Optical touch sensor adapted for outdoor use

Detection of false fingerprints

2N® ACCESS UNIT TOUCH KEYPAD

Touch keypad for entry of user's PIN code

Automatic calibration preventing detection of false touches (e.g. raindrops)

Adjustable intensity of keypad backlighting

HIGHER LEVEL BUILDING SECURITY

For entry to a building with a higher level of security such as a bank, the user must prove their identity using a PIN code and their RFID card.

PROTECT THE ENTRANCE TO COMMUNAL PARTS OF THE BUILDING

Protect your property stored in the communal parts of an apartment building. Allow only authorised persons with their own PIN code access.

2N ACCESS UNIT M

Access unit based purely on IP technology

Pigtail for simple connection of an Ethernet cable also ensuring power (PoE)

Narrow design suitable for installation on a door frame

Adapted for installation on various surfaces (metal, glass, brick)

Toughened glass on the front of the unit guarantees a resistance to scratches

Multi-frequency RFID card reader (125kHz and 13.56MHz)

Pigtail for connection of inputs and outputs

Suitable for both indoor or outdoor installation

Elegant design for the office environment

Remote configuration and administration via 2N® Access Commander or 2N® Remote Configuration

-40°C to 55°C

2N ACCESS UNIT M

COMING
SOON

2N® ACCESS UNIT M RFID

Seamless transition from unsecured to secured smart cards

Open doors using a phone with Android OS supporting NFC

Terminal for recording employee attendance

COMING
SOON

2N® ACCESS UNIT M BLUETOOTH & RFID

Open doors using a phone with the 2N® Mobile Key app (mobile credentials for free)

Various modes for opening doors with adjustable distances

Encrypted, secure communication between the phone and the unit

COMING
SOON

2N® ACCESS UNIT M TOUCH KEYPAD & RFID

Touch keypad with adjustable backlight intensity

Audio and visual response to every touch

Multi-factor authentication of users in areas with enhanced security

ATTENDANCE SYSTEM

The access unit works as an easy attendance terminal recording all of your employees' arrivals and departures.

TRANSITION FROM RFID CARDS TO MOBILE CREDENTIALS

The ideal solution for office buildings where some employees want to start using their smartphones with the 2N® Mobile Key application to gain entry to the building instead of traditional RFID cards.

2N® ACCESS COMMANDER

2N® ACCESS COMMANDER Box

Distributed as an image for
server installation
(free download from www.2n.cz)

Tool for configuration and
management of the access control
system*

Administration through an intuitive
web interface comprehensible to
the ordinary user*

Basic time and attendance system
for keeping records of working
hours*

Software pre-installed and distributed
on mini-PC

“Plug and play” solution - only the
power supply and network required

Advanced monitoring of the status of
all connected devices with
notifications*

Access logs and alarm notifications
with snapshots of the visitors*

INTEGRATION WITH MILESTONE XPROTECT VMS

An administrator can watch the video from cameras tied up with access logs from 2N® Access Commander via one common interface.

ATTENDANCE TRACKING

2N® Access Commander allows you to track your employees' attendance on everyday basis. The attendance list can be then exported into .pdf or .csv format and processed further. Also, the data could be sent via API to 3rd party systems.

2N® SIP AUDIO

2N® SIP SPEAKER

SIP based loudspeaker for live or pre-recorded announcements

Seamless compatibility with video management software (VMS) and IP PBXs

Internal scheduler for broadcasting preset announcements

Easy installation with a single cable (PoE)

2N® SIP SPEAKER HORN

Outdoor IP speaker for live and preset announcements across large areas

Loudest IP based speaker on the market (SPLmax 124dB)

Seamless compatibility with video management software (VMS) and IP PBXs using ONVIF and SIP protocols

Easy installation with a single cable (PoE)

2N® SIP MIC

SIP based paging console for live or preset announcements

Announcements up to 12 zones using multicast support

Remote control of door locks (or any 3rd party device) using http supported commands

Easy installation with a single cable (PoE)

2N® SIP AUDIO CONVERTER

SIP Audio to analogue audio converter

Seamless compatibility with video management software (VMS) and IP PBXs using ONVIF and SIP support

Broadcasting sounds from Cisco devices using Informacast support

Simple API for system integrators

DOCTOR'S WAITING ROOM

It lets you play live or pre-recorded messages from an IP connected telephone. A nurse can thus easily make “next please” announcements and the like, right into the waiting room.

ANNOUNCEMENTS INTO PRODUCTION HALLS

Announcements into as many as 12 zones without having to install a server. You can broadcast specific content into individual zones or to the entire system

LIVE ANNOUNCEMENTS FROM THE VMS

In case an uninvited visitor gets in, you can immediately respond with a live or preset message directly from the VMS and swiftly deter an intruder.
